

Belmont plans changes that would raise your rent

- Belmont is updating its map of what can be built where
- San Mateo County added 75,000 jobs, only 4,000 housing units since 2010
- More jobs and no new housing means **more competition for apartments:** Average rent in San Mateo County has gone from \$1600 to \$3100 (2x!) since 2010
- Belmont wants to add 3300 jobs and *only 1500 housing units*.
- This will increase competition for apartments in Belmont!
- **More competition for apts means your rent will go higher!**

Contact the City of Belmont and ask for more new housing and less new office space:
